

How to activate your 400 credits in Google Skills - Step by Step

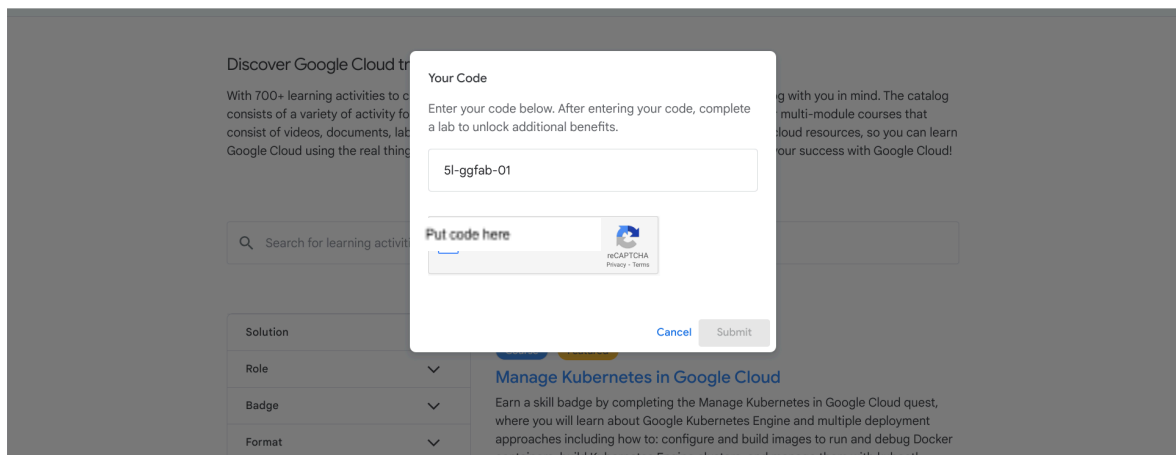

This will be a long guide. Make sure you read it carefully and follow every single step to successfully redeem your credits.

It's important that you activate your 400 credits in [Google Skills](#) as soon as possible. You need to do it before **10th July, 2026**. There will be no extensions on this deadline.

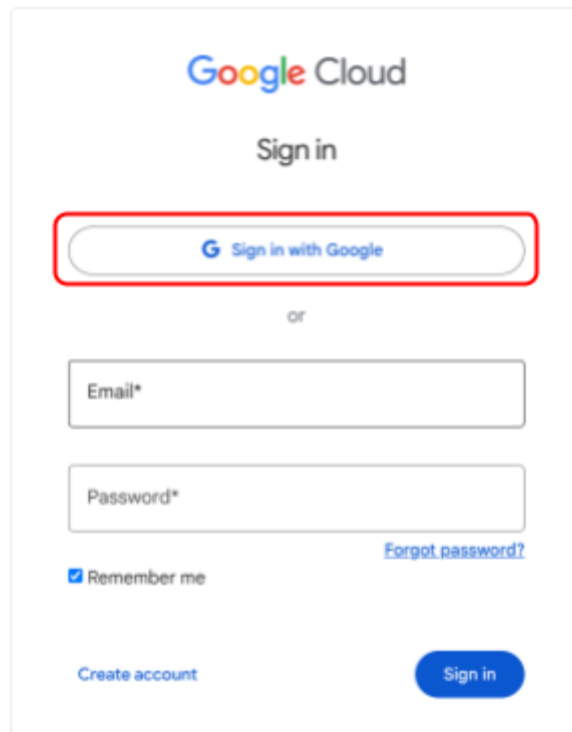

👤 If you encounter corporate email restrictions, please use a personal account. When signing in, select the "Sign in with Google" option. This approach can help bypass limitations sometimes present with corporate accounts.

Now follow carefully all these steps, exactly as they are shared below:

1. First, make sure you are logged out from Google Skills. Open the next link in an Incognito window: <https://www.skills.google/catalog?event=Your> . It will ask you to enter a code. Use this code: **1p-gcesgsc-43** making sure there are no blank spaces, and click on submit.

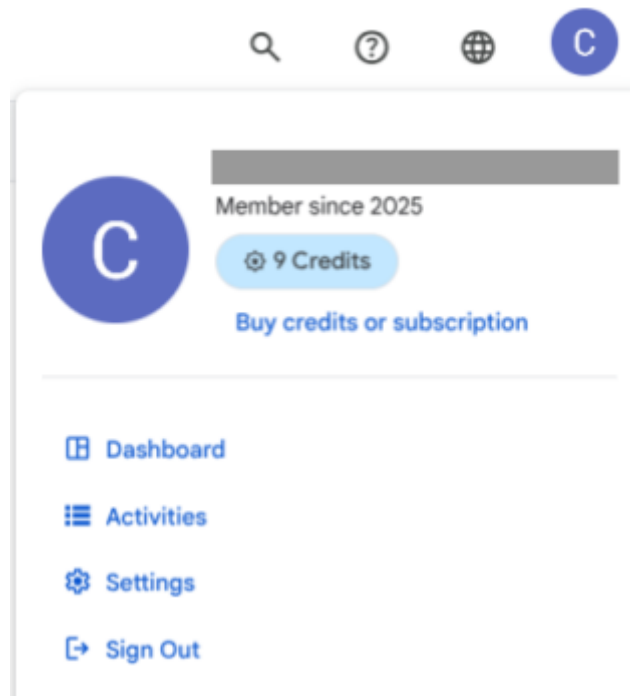

2. Now sign in to Google Skills using a personal account to avoid restrictions with your corporate email. Use a Google Account clicking on "Sign in with Google".

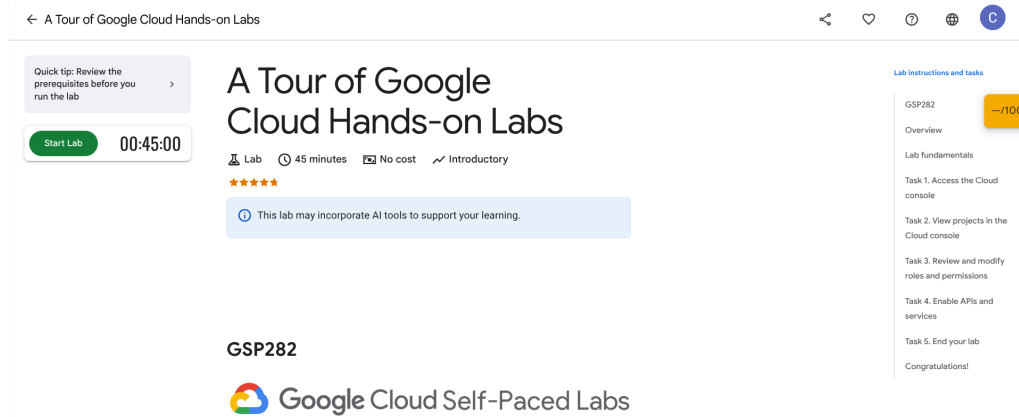

The image shows the Google Cloud sign-in page. At the top is the Google Cloud logo. Below it is the text "Sign in". A red rectangle highlights the "Sign in with Google" button. Below this button is the word "or". There are two input fields: "Email*" and "Password*". To the right of the "Password*" field is a link that says "Forgot password?". Below the input fields is a checkbox labeled "Remember me". At the bottom left is a link "Create account", and at the bottom right is a blue button labeled "Sign in".

3. Once signed in, when clicking on your profile picture you should see the initial 9 credits available. You may see it says "Starter". If this is the case, click there and you should be able to see 9 credits.

Important: If you don't see the 9 credits you need to repeat the steps. You can't continue with the activation until you see the 9 credits in your account.

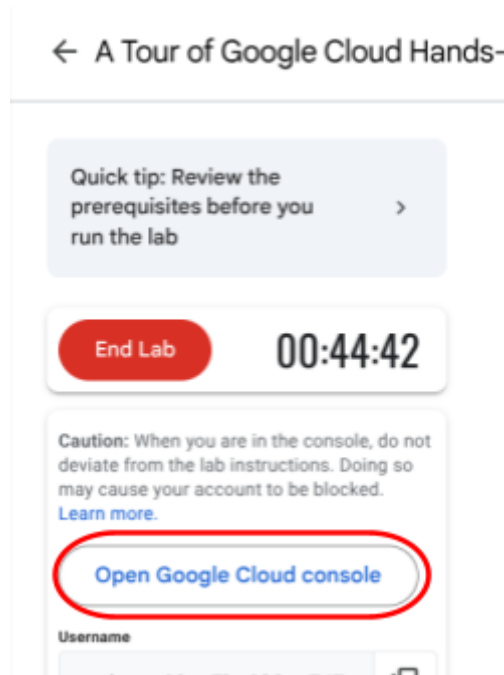

4. To activate the 400 credits on your profile, you must complete a lab. We suggest "[A Tour of Google Cloud Hands-on Labs](#)" which is a quick process, taking under 5 minutes. For this lab, we recommend using a Chrome incognito window. Simply click the link and select "Open on an incognito window."

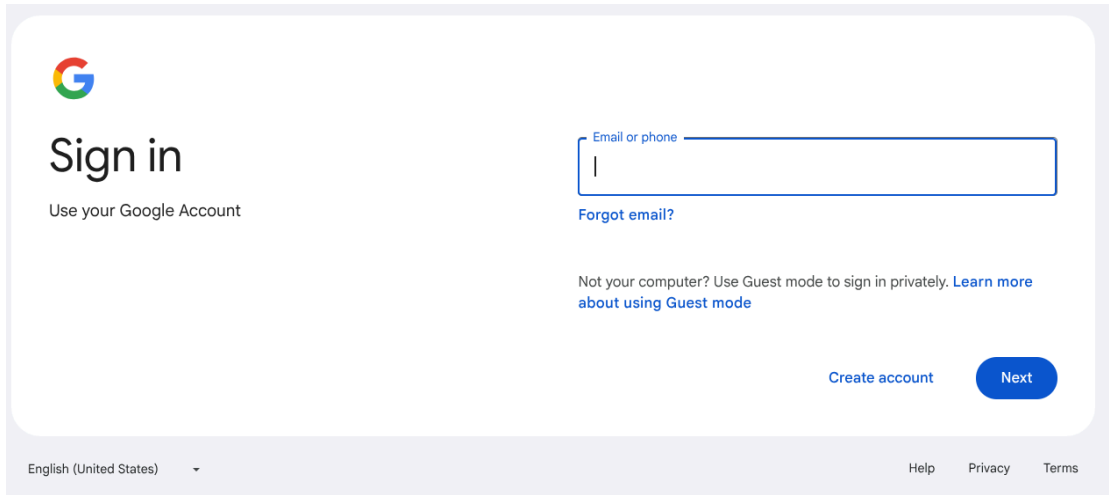

!!We recommend completing the lab in English and avoid changing the language since some translations aren't updated and this could be a problem when following the steps.

5. Once you click on "Start Lab" you need to open the Google Cloud Console

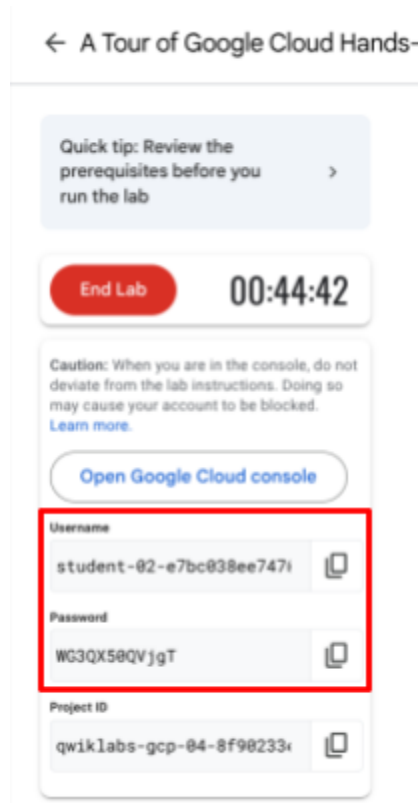

6. You will be asked to enter a Username and a Password.

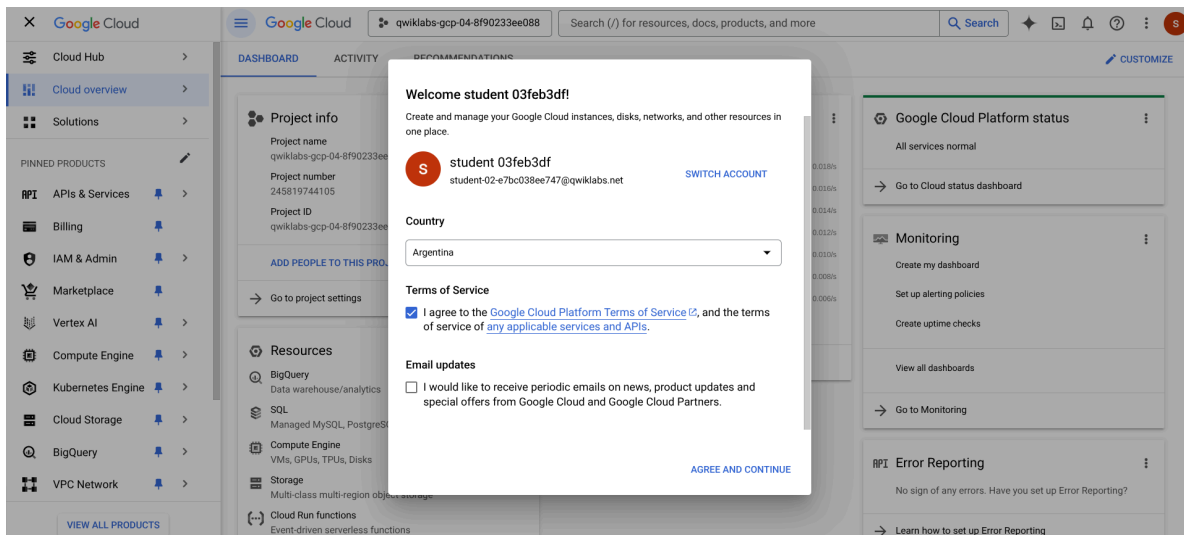

The image shows the Google Sign in page. On the left, there is the Google logo and the text "Sign in" followed by "Use your Google Account". On the right, there is a text input field labeled "Email or phone" with a cursor inside. Below the input field is a link that says "Forgot email?". Further down, there is a message: "Not your computer? Use Guest mode to sign in privately. [Learn more about using Guest mode](#)". At the bottom right, there are two buttons: "Create account" and "Next". At the very bottom, there is a language selector showing "English (United States)" and links for "Help", "Privacy", and "Terms".

!!Make sure to enter the temporal credentials that Google Skills gives you to perform this lab. You can find it in the main page of the lab, as you can see in the screenshot below (the credentials in the image below are an example, make sure to enter the credentials Google Skills will provide you while performing this step). Do not use your own email address to access the console, as it won't work.

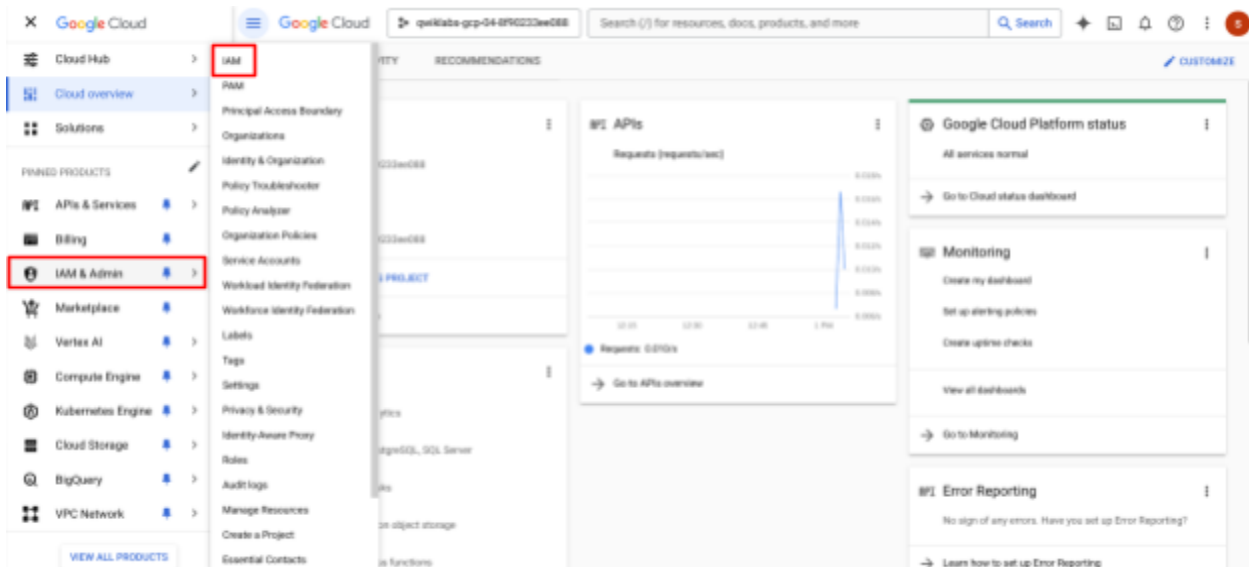

The image shows a section of a lab interface titled "A Tour of Google Cloud Hands-". It contains a "Quick tip" box with the text "Review the prerequisites before you run the lab" and a right arrow. Below this is a red "End Lab" button and a timer showing "00:44:42". A "Caution" box follows, stating: "When you are in the console, do not deviate from the lab instructions. Doing so may cause your account to be blocked. [Learn more.](#)". Below the caution is a button that says "Open Google Cloud console". At the bottom, there are three input fields: "Username" with the value "student-02-e7bc038ee747i", "Password" with the value "WG3QX50QVjgT", and "Project ID" with the value "qwiklabs-gcp-04-8f90233r". Each input field has a copy icon to its right. The entire credentials section is highlighted with a red rectangle.

7. You will be asked to accept the terms of services.

8. Click on the Navigation menu and select IAM & Admin > IAM.

9. Click on Grant Access, which will open what you see on the second screenshot below:

The first screenshot shows the Google Cloud IAM console for project "qwiklabs-gcp-04-8f90233ee088". The "Permissions" tab is selected, and the "Grant access" button is circled in red. The table below shows the current permissions:

Type	Principal	Name	Role	Security insights
Service account	admin@qwiklabs-services-prod.iam.gserviceaccount.com		Owner	
Service account	qwiklabs-gcp-04-8f90233ee088@qwiklabs-gcp-04-8f90233ee088.iam.gserviceaccount.com	Qwiklabs User Service Account	BigQuery Admin	
Service account	qwiklabs-gcp-04-8f90233ee088.iam.gserviceaccount.com		Owner	
Service account	qwiklabs-gcp-04-8f90233ee088.iam.gserviceaccount.com		Storage Admin	
User	student-02-e7bc038e747@qwiklabs.net	student-02@qwiklabs.net	Editor	
			Project IAM Admin	
			Viewer	

The second screenshot shows the "Grant access to" dialog box. The "Add principals" section is highlighted, showing a search bar for "New principals". The "Assign roles" section shows a dropdown for "Select a role" and a checkbox for "IAM condition (optional)".

10. To grant the access, you will have to go back to the lab and check task 3 where you will find the identifier you have to put in "Add Principals".

The screenshot shows the Google Cloud Hands-on Labs interface. The main content area displays the "Grant an IAM role" task. The task instructions are as follows:

- On the **Navigation menu** (☰), click **IAM & Admin** > **IAM**.
- Click **Grant access**.
- In the **Add principals** section, enter an identifier **student-02-e7bc038e747@qwiklabs.net** for the principal.
- From the **Select a role** drop-down menu in the **Assign roles** section, search for **Viewer**, then click **Viewer**.
- Click **Save**.
- Verify that the **principal** and the corresponding **role** are listed on the **IAM** page.

The right sidebar shows the "Task 3. Review and modify roles and permissions" task, which is highlighted with a red box. The task progress bar shows 0/100.

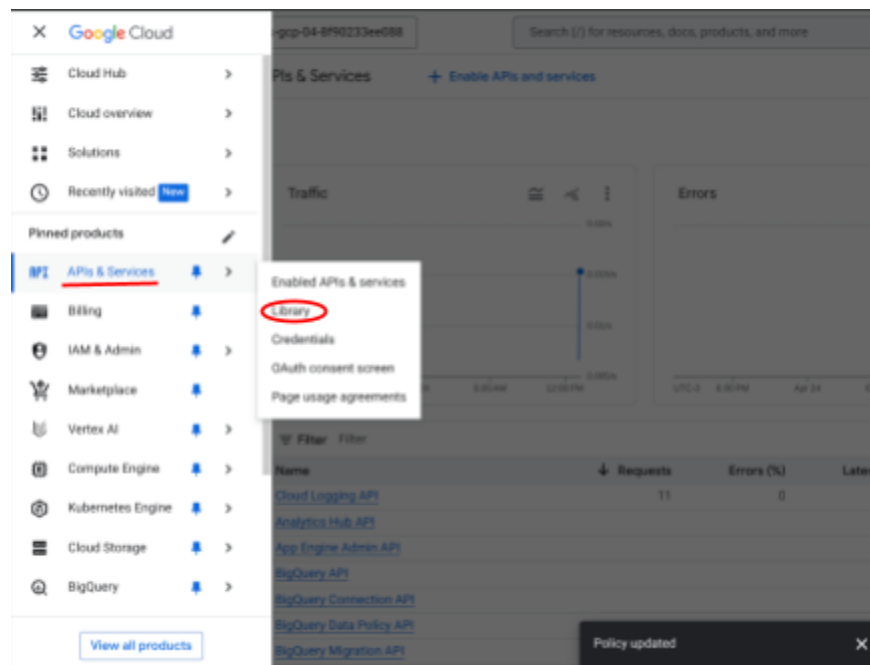

11. Copy the identifier ID and paste it in New Principals. Then change the role to Basic > Viewer and click save:

The screenshot shows the Google Cloud IAM console. On the left, the 'Permissions for project "qwklabs-gcp-04-8f90233ee088"' page is visible. The main area shows the 'Grant access to "qwklabs-gcp-04-8f90233ee088"' page. The 'New principals' field is populated with 'student-02-e7cb883148bd@qwklabs.net'. The 'Role' dropdown is set to 'Viewer'. The 'Save' button is highlighted with a red box.

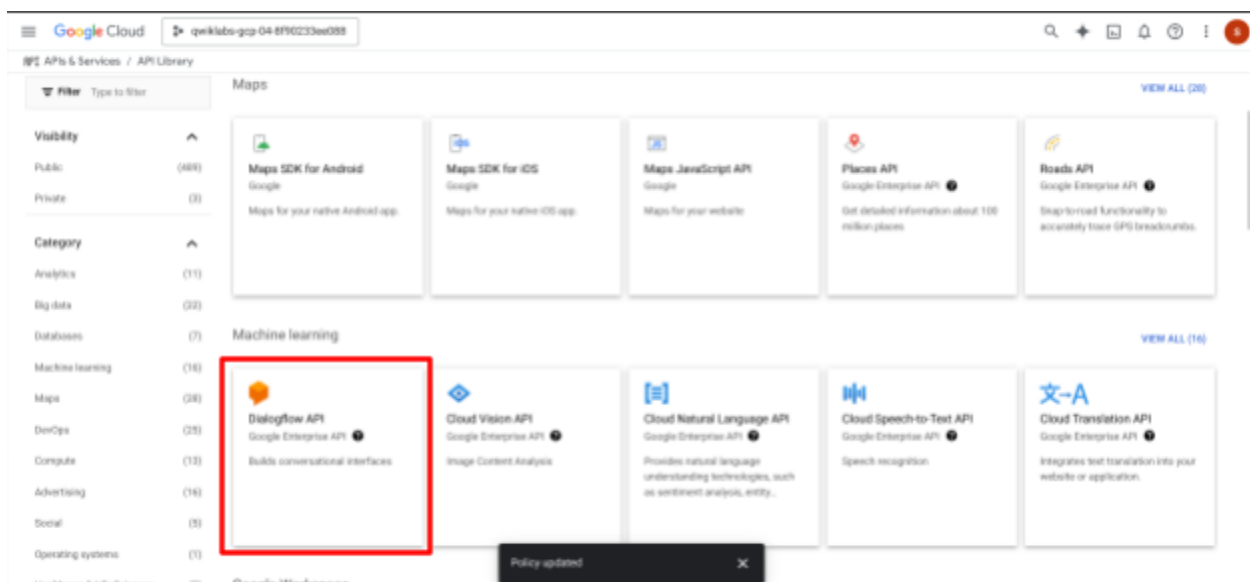

12. Go back to the lab and check the first progress:

The screenshot shows the 'A Tour of Google Cloud Hands-on Labs' interface. The 'Checkpoints' section is highlighted in orange. It contains two checkpoints: 'Grant an IAM role' and 'Enable the Dialogflow API'. The 'Grant an IAM role' checkpoint has a progress indicator of '0 / 50' and a 'Check my progress' button. The 'Enable the Dialogflow API' checkpoint has a progress indicator of '0 / 50' and a 'Check my progress' button. The 'Check my progress' button for 'Grant an IAM role' is highlighted with a red box.

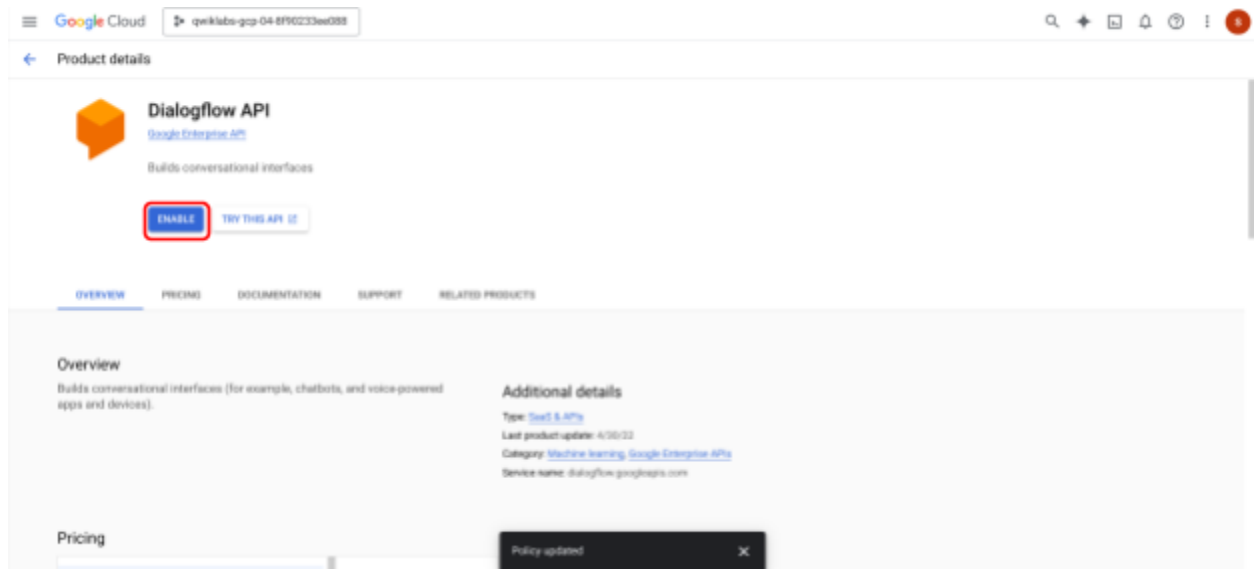

13. Now go back to the console and click on the navigation menu at the left and search for APIS and services > Library:

14. Once you click on “Library”, you need to search for the Dialogflow API. You can search for it in the search bar but you can also find it easily by scrolling down:

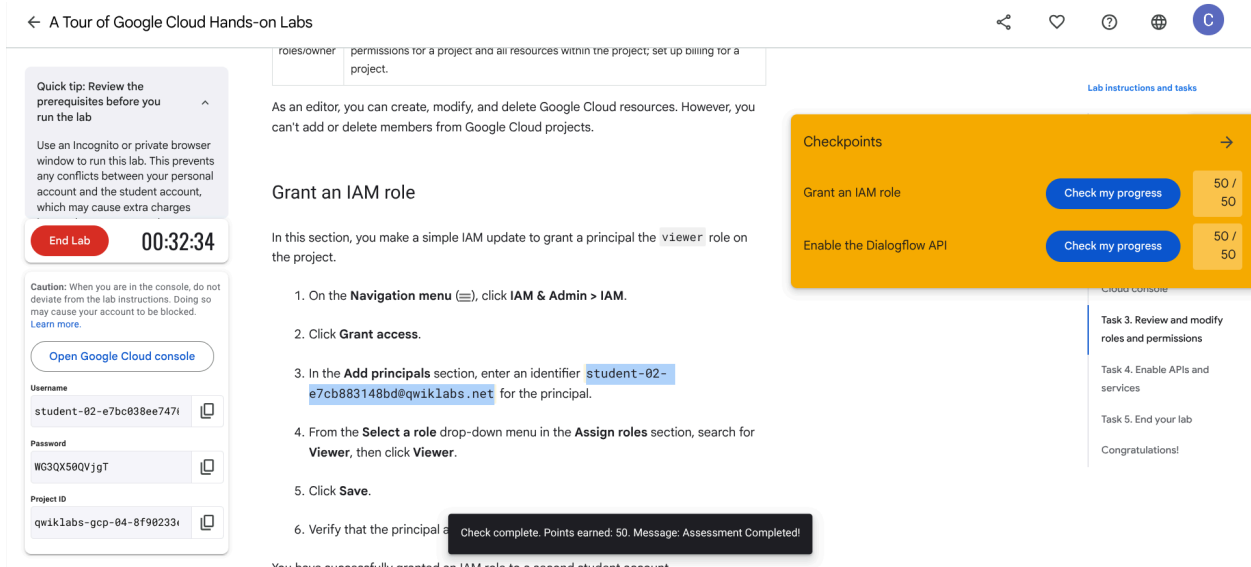

15. Once you click on “Dialogflow API” box you should click on “Enable”:

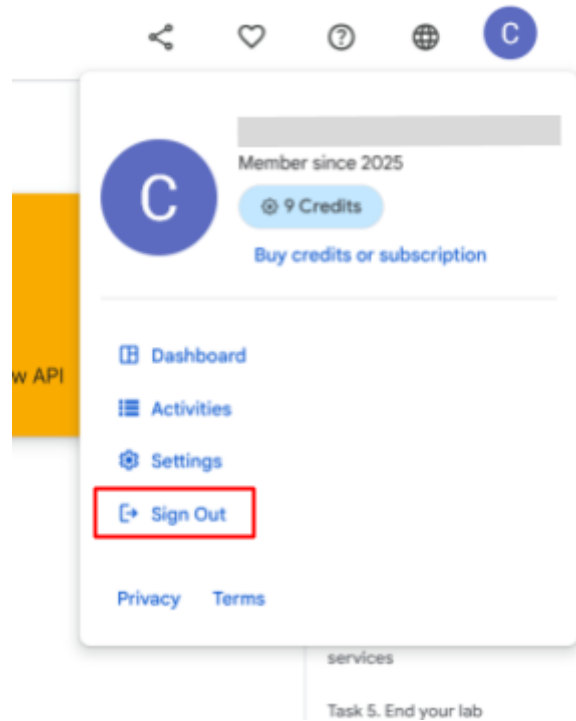

16. You'll need to wait a few seconds. After enabled you need to go back to the Lab instructions and check the second progress in the orange box at the right side.

17. After clicking in “Check my progress” you may now see 50/50. We're almost there!!

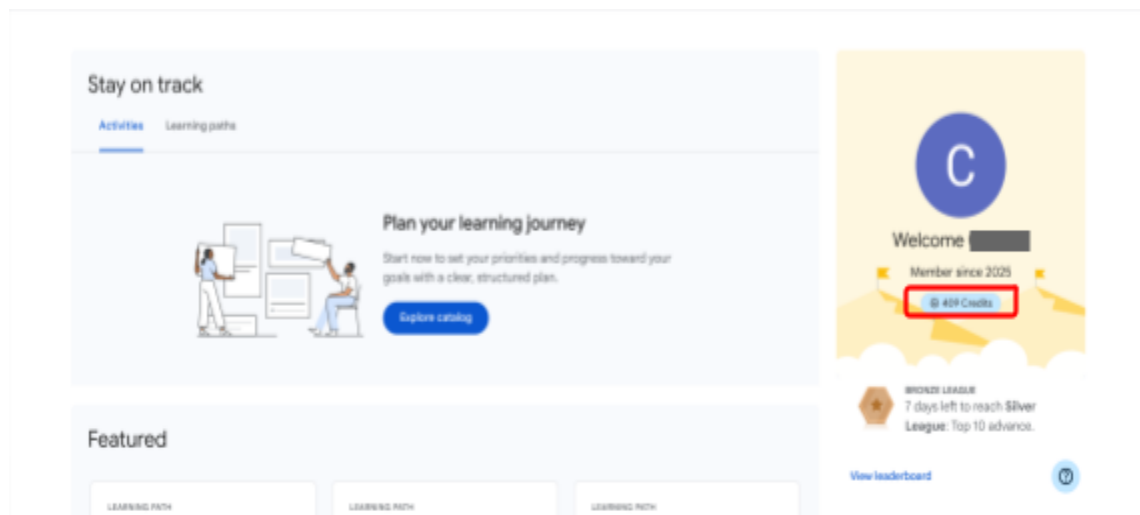

18. Now that your checkpoints are completed, you need to go to the red box on the left and click on “End lab”.

19. Now you sign out from your Google Skills account.

20. Now you sign in to your account and you should be able to see 400 credits when clicking in your profile picture!

If you still don't have access please reach out to me at saumyanautiyal@xwf.google.com and I'll do my best to help you. But if you follow each step as indicated, everything should be good 🍀
